Beat the Summer Bills

With summer right around the corner, energy bills are about to rise—but you can get ahead of the heat by going solar in May. Installing now means your system will be up and running before peak cooling season, helping you significantly cut costs when AC usage spikes. Don't wait until those high bills hit, lock in long-term savings and enjoy a cooler, more affordable summer with Seapoint Solar.

Embrace the season and start turning sunshine into serious savings!

No Credit, No Problem!

No credit? No problem! At Seapoint Solar, we believe everyone should have access to clean, affordable energy. That's why we offer no credit financing options, making it easy for homeowners to go solar without worrying about their credit score. Start saving on your energy bills with \$0 down—because going solar should be stress-free!

Solar Myths Busted

Still on the fence about going solar? It might be because of some common misconceptions. At Seapoint Solar, we hear it all the time—"Solar's too expensive," "It won't work on cloudy days," or "It's only for big houses." The truth? Solar is more accessible, affordable, and reliable than ever. In this month's spotlight on our Facebook, we're setting the record straight and giving you the facts you need to make an informed, confident decision about going solar.

Commercial Solar

Cut operating costs and boost sustainability with commercial solar solutions from Seapoint Solar. Whether you're looking to reduce your energy bills, take control of long-term expenses, or meet green energy goals, solar is a smart investment for any business.
