Stars, Stripes & Savings

Summer Sun = Summer Savings

As temperatures rise, so do energy bills, but not for solar homeowners. Summer brings longer days and more sunshine, which means your solar panels are working at peak performance. That extra sunlight translates into more energy production and bigger savings on your electric bill. Whether you're running the AC around the clock or powering up pool equipment, solar helps offset those high summer energy costs.

Main Updates

- Summer Sun = Summer Savings
- Red, White, Blue & Green
- Solar Financing
- Smart Cooling Tips
- July Heatwave, Solar Savings

With Seapoint Solar, you can make the most of the season and put the sun to work for your home saving money while staying cool.

Low Credit, No Problem!

Low credit? No problem! At Seapoint Solar, we believe everyone should have access to clean, affordable energy. That's why we offer low credit financing options, making it easy for homeowners to go solar without worrying about their credit score. Start saving on your energy bills with \$0 down—because going solar should be stress-free!

Red, White, Blue & Green

This July, we're celebrating more than independence; we're celebrating the freedom to choose clean, affordable energy. Going solar isn't just patriotic, it's practical. By harnessing the power of the sun, homeowners can reduce their dependence on fossil fuels, lower their electric bills, and contribute to a greener future for America. With federal tax credits and local incentives still available, there's never been a better time to declare your energy independence. Seapoint Solar is proud to help families across the U.S. go green—one rooftop at a time.

Smart Cooling Tips

Maximize your summer comfort and savings by pairing solar with smart cooling solutions. Smart thermostats help you control temperatures efficiently, while energy, efficient windows and heat-reflective roofing reduce indoor heat buildup.

July Heatwave, Solar Savings

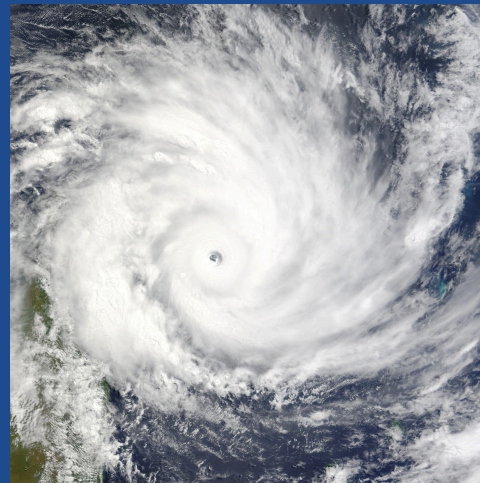

When the July heat hits, air conditioners work overtime—and so does your energy bill. But with solar, you can stay cool without the cost. Solar panels generate the most power during the sunniest months, which perfectly aligns with peak AC usage. That means while your neighbors are sweating over rising bills, you're enjoying steady savings powered by the summer sun.

Solar Financing

Going solar is more affordable than ever with flexible financing options designed to fit your budget. Seapoint Solar offers zero-down plans, no credit check programs, and customized monthly payments that often cost less than your current electric bill. Whether you're looking to own your system or pay as you go, we'll help you find the right option to start saving from day one—no upfront costs required.

Hurricane Season Prep

Storm season is here, are you ready? With backup battery solutions, you can keep the lights on even when the grid goes down.

Paired with solar, it provides reliable, seamless power during outages so you're protected no matter what the forecast says.
