Summer Is Ending

As summer winds down and fall moves in, there's no better time to start thinking about how you power your home. Solar isn't just a summer solution it can help you take control of your energy costs all year long. Whether you're considering solar, battery storage, or an EV charger, Seapoint Solar can help you build a smarter energy plan for the seasons ahead. And with 2 years of solar lease payments covered, your opportunity to start saving doesn't have to end with summer.

Main Updates

- Summer Is Ending
- Two Years of Lease Payments Covered
- Your Garage Can Be Your Gas Station
- Fall Storms Are Coming
- Want Solar Without Buying the System?

As we move into September and summer gives way to fall, now is the perfect time to take control of your energy costs and start enjoying the benefits of solar all year long.

The Ultimate Home Energy Team

Solar, battery storage, and an EV charger—now that's a winning lineup!

Generate energy from your roof, store it for when you need it, and use it to help charge your ride. This fall, give your home an energy team built to perform all season long

Two Years of Lease Payments Covered

Thinking about going solar? Now is the time to make your move. For a limited time, Seapoint Solar is making the switch even easier by covering your solar lease payments for TWO full years! That's 24 months of lease payments covered while you start enjoying the benefits of solar energy at your home. Summer may be coming to an end, but this offer is just heating up. Don't wait... ask us how you can go solar this fall and take advantage of two years of covered lease payments!

Fall Storms Are Coming

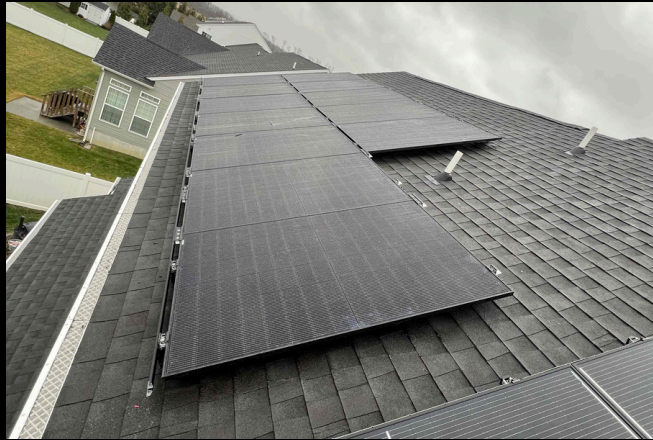

Fall weather can bring unexpected storms and unexpected power outages. Battery storage gives your home an extra layer of energy security, storing power for when you need it most. Pair a battery with your solar system and stay better prepared for whatever the season brings.

Want Solar Without Buying the System?

Going solar doesn't have to mean purchasing a system upfront. Solar leasing gives you another way to enjoy the benefits of clean, renewable energy without the traditional cost of ownership. And right now, Seapoint Solar is making it even better with 2 years of lease payments covered! Ask us how you can make the switch this fall.

Your Garage Can Be Your Gas Station

Skip the extra stops and make charging your EV as easy as plugging in at home. With a professionally installed home EV charger, you can charge conveniently from your own garage or driveway and start your day ready to hit the road. Pair your EV charger with solar, and you can take your home energy setup even further; powering your home and helping charge your vehicle with energy generated right from your roof. Talk to Seapoint Solar about making home charging part of your energy plan.

ASK SEAPOINT!

Got a question about solar? Send it our way! Whether you're curious about solar panels, leasing, battery storage, EV chargers, savings, or how the whole process works, we want to hear from you. Submit your question to Seapoint Solar, and we may answer it in an upcoming video!
